

Surface Mount Micro WiFi, WiMAX & 4.9 Public Safety

- Mounts easily to vehicle or fixed utility box with a small 9/16" mounting hole (14.3 mm)
- Impressive 2.5 dBi gain in a thumb-sized radome
- Rugged and weather tight ASA radome with foam sealing gasket

The MRM Series antenna radome consists of white or black UV resistant plastic with a heavy duty metal base.

The bottom mounting plate is outfitted with a foam gasket for complete outdoor weather sealing.

tions. The MRM-UMB model, for example, covers 1.7-6.0 GHz. The MRM antenna design is "thumb" sized, only 1.35" H x 1" D (34 mm x 25mm). These antennas have a 1/2" diameter stud (13 mm) for mounting on up to 3/8" thick surface (9.5mm).

The MRM Stud mount series are micro-antennas that provide

gain and performance that is close to larger products.

A variety of single and dual band models are available for

To mount the antenna, access to the underside of the body surface is required. A Hex mounting nut is also provided.

The antennas are normally outfitted with 1 foot (305 mm) of low loss -195 cable with an SMA Plug (Male) connector. Antennas can be factory ordered with any cable length and connector required. Jumper cables can be provided for completing a longer installation.

Peak antenna gain performance is 2.5 dBi for the MRM Series. The antennas should be mounted on metal for best overall performance.
