

## radino USB-Stick

The In-Circuit radino USB-Stick is an USB to radio bridge.

Depending on the used radino module, different kinds of radio networks can be built up.

The radino UART-Bridge is compatible to all radino and radino 32 modules.

radino USB-Stick  
(with radino 32 DW1000)

## Features

- Arduino-compatible with radino / radino 32 module
- USB for programming and power supply
- RP-SMA plug for antenna connection
- ISP connector on bottom side to program the radino module
- Reset and boot select button on bottom side
